Ryan Craun

Product Designer | Consumer, Mobile & Systems
Columbus, OH • (740) 272-2590 • craunryan@gmail.com • ryancraun.com • linkedin.com/in/ryancraun

SUMMARY

Product designer with 2+ years in-house (FEVO, PickTheOdds, Resilience) and freelance client work since 2018. I design consumer and B2B products on mobile and web, and build what I design. I designed and built two native iOS apps solo in SwiftUI, one live on the App Store and one in App Review.

EXPERIENCE

Product Designer — FEVO **Nov 2025 – Present**

Group-commerce platform for live events & ticketing • Remote

- Design consumer growth surfaces end to end, from research through high-fidelity design and handoff, partnering with product and engineering leads in regular design critiques.
- Designed a social sharing and referral program built around a first-of-its-kind influence-attribution leaderboard that pinpoints who drove each new user, enabling targeted incentives that increased referred sign-ups 24% and lifted social-sharing revenue 30%.
- Designed “Gibson,” an AI offer-building agent (in pilot) that turns a multi-step workflow into one guided prompt, projected to cut offer-creation time up to 80%; every pilot client committed to it as their primary workflow.
- Designed the platform’s first consumer collection marketplace, a new purchase surface and revenue stream.

UX/UI Designer (Contract) — PickTheOdds **Dec 2023 – Jul 2024**

B2B SaaS sports analytics platform • Columbus, OH

- Redesigned navigation and filters for a subscription analytics product; daily active users grew from 50 to 500+ over the engagement.
- Grouped a flat filter panel into categories, cutting time to select a betting category 31% in timed user tests; user retention rose 25%.
- Ran usability testing with 20+ users and research with a 700+ member Discord community; built a 200+ component Figma library and a subscription and billing flow.

UX/UI Designer — Resilience Inc. **Jul 2023 – Dec 2023**

Native mobile app • Tampa, FL (Remote)

- Designed prototypes for 10+ native mobile features, contributing to a 15% lift in engagement, as the interaction-design point of contact for four developers.

Freelance UX/UI Designer & Front-End Developer **2018 – Present**

Consumer e-commerce, landing pages & brand • Upwork Top Rated, 100% Job Success

- Design and build e-commerce and landing pages through responsive build and launch, including a premium nootropic brand page that cut bounce 25%.

SELECTED PROJECTS

- **Copia** (native iOS, live on the App Store) — Grocery list built for the aisle. Solo design and SwiftUI build; 3,052 competitor reviews mined; 6 updates in six weeks.
- **Teneo** (native iOS, in App Review, Nov 2026) — Strength and protein companion that adapts to the user’s medication week. Solo design and SwiftUI build; 21,452 competitor reviews mined.
- **Vault** (web) — Ad-free, spoiler-safe gaming guides; 4,900 users in its first eight months.
- **Multi-agent AI design team** — A five-role AI agent pipeline with a shared knowledge base that I direct to research, build and critique my product work.

SKILLS

Design: Product, Interaction & Visual Design, Native iOS, Design Systems, Prototyping, Motion, Accessibility (WCAG)
Research & growth: Usability Testing, User Interviews, Review Mining, A/B Testing, Onboarding, Retention
Tools & build: Figma, Framer, SwiftUI, iOS, React, HTML/CSS/JS, Supabase, Git, AI agent workflows

EDUCATION

The Ohio State University — B.A., Cognitive Psychology (Design Thinking), 2024 • UX/UI Design Certificate, 2023
